Claire Finn? A woman of many talents. A woman to be respected. A woman to be feared.

Let me explain.

It's often been said that you shouldn't push a patient person to the breaking point, and Dr. Finn is certainly a patient woman. You begin to understand this when you look at what she deals with daily on the Orville. And she didn't have to take that post; she could have gone just about anywhere in the Union Fleet, but that's a different story.

It's also been said that the most dangerous creature in the world is a mother protecting her cubs. And Dr. Finn is that, too.

So, on board the Orville, you have a mother protecting her brood, pushed to the edge of her patience on a daily basis. You do the math.
